2011-2013 Scion tC Rear Dome Light Replacement

How to replace the overhead lighting systems in the rear of the cabin.

Written By: Nick d'Alencon

TOOLS:

- Spudger (1)

PARTS:

- Dome light replacement bulb (1)

Step 1 — Rear Dome Light

- Using a pry tool, remove the clear plastic bulb housing from the roof of the car.

Step 2

- Locate LED housing and remove it.
- When inserting the replacement, take note of the direction and polarity of the unit.

To reassemble your dome light, follow these instructions in reverse order.
